***Population Health Metrics* is an open access, peer-reviewed, online journal addressing all aspects of measurement of the health of populations.**

*Population Health Metrics* provides coverage of a variety of topics relating to the concepts, methods and ethics application and results in the measurement of the health of populations. Topical areas of interest include measures of health state, valuation, population health, and inequality in population health, descriptive epidemiology of major diseases at the population level, burden of disease and injury analysis, disease and risk factor modelling for populations, and comparative assessment of risks to health at population.

The journal considers the following article types: research articles and reviews. For further details, see [www.pophealthmetrics.com/info/about/](http://www.pophealthmetrics.com/info/about/).

**Reasons for publishing in *Population Health Metrics*:**

- All articles published in the journal are open access; universally accessible online without charge.
- High visibility for your work - anyone with Internet access can read your article, free of charge.
- Included in PubMed - making your work easy to find, read and cite.
- Articles are published immediately upon acceptance.
- Authors retain the copyright of their articles.
- Electronic submission and peer-review makes the whole process of publishing your article simple and efficient.
- Publishing online means unlimited space for figures, extensive datasets and video footage.
- Professional formatting meets the standards expected by researchers.
